

## Yavonne Martinez

---

Yavonne desires to ensure that all children have the opportunity to succeed academically and be well-rounded students. She attended public schools K-12; however, for their children, she and Noel, her husband, wanted to offer their children an opportunity to grow confident within and care for the environment in which they live. Thus, their children's education was primarily at Kingwood Montessori School for lower-elementary and now public school for middle school and high school.

As a clinical pharmacist, she practices in managing individuals' chronic disease states such as diabetes and high blood pressure. Yet, the most rewarding part is still providing educating interns who rotate through her practice site. She and Noel have three children with whom the majority of their time is spent being involved with school sports and club sports.
